shelving**

High density modular storage system

Customised modular racking system for cabinets, carts and open frame racks

From our extensive knowledge in the healthcare industry, NSC understands the space and storage requirements of all specialised areas, including pharmacies, anaesthesia workrooms and medicine supply rooms and develops customised, efficient shelving solutions for each and every application

NATIONAL SURGICAL CORPORATION PTY LTD

Bringing leading technologies to the Australian medical industry

High density modular storage system

The high density modular storage systems range includes cabinet systems, storage carts, procedure carts and open framed racking systems which all incorporate the interchangeable module racking system. The entire system is based on the ISO standard 60x40 and the modules have been designed on this basis.

The modular systems are available as standard units or can be custom designed and built using various cart, rack or cabinet options to suit your storage parameters.

These modular systems are ideal for storing, organising and transporting medicines, pharmacy bottles, anaesthetics, sutures and small consumables.

Why use modular systems:

- Maximise storage capacity and organisation
- Reduce overall inventories through stock rotation
- Improve the aesthetics of your storage area
- Reduce potential OH&S risks by ability to move modules to various levels as required
- Fully customise the area to suit your needs

High density basket storage systems are ideal for:

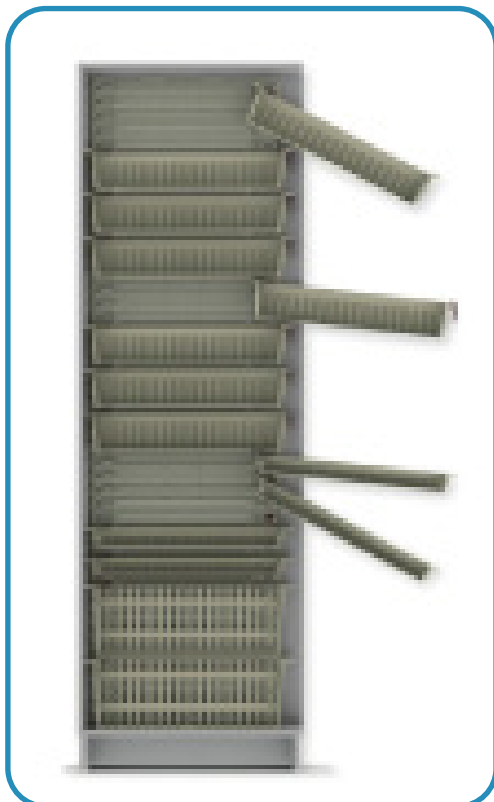

- Any hospital department or health care facility
- Aged care
- Day surgery
- Pharmaceutical manufacturer
- Anaesthetics store rooms
- Medicine store rooms
- Suture trolleys or carts
- Pharmacy

Experts in hospital redevelopments and refits

NSC has installed and delivered shelving solutions to over 170 customers, mostly hospitals to assist in redevelopments, fitouts and upgrades.

NSC has the capabilities to design and install large scale hospital redevelopment projects. NSC provides detailed CAD designed drawings to demonstrate the correct scale and size of the shelving site.

HOW THE SYSTEM WORKS

The entire high density modular storage system is based around the uniquely designed side panels and interchangeable baskets, trays and shelves (modules).

The Tilt side panels attach to the wall of the cabinet, cart or trolley and allows the modules to be placed at various levels to improve organisation and stock rotation. The enhanced Tilt side panels allow 9 horizontal insertions and either gently or steeply (116°) tilts when pulled out, depending on the position of the stop clip. The steep angle of the tilt makes the module easier to use, particularly in the upper areas of the cabinet.

The units are designed in either E (600mm wide) or U (400mm wide) configurations and additional 'columns' can be added to make it wider. All modules are designed to fit in either an E or U style systems and are available in 5cm, 10cm or 20cm heights.

The modules are a retractable system which have a unique safety-stop function which prevents the module from accidentally falling out when pulled. The baskets can be tilted in two different angles to view and access the stored items. Dividers, label holders and other accessories can be attached to baskets to suit the items being stored and improve organisation.

Baskets - 10cm, 20cm

Trays (solid) - 5cm, 10cm, 20cm

for the hospital and healthcare industry

TRAYS, BASKETS & ACCESSORIES

- ISO standard: 60x40cm, 30x40cm
- Smooth and easy-to-clean surfaces
- Machine-washable, easily and safely cleaned
- Modules and dividers are injection molded from polycarbonate ABS plastic
- Modules hold up to 40kg (with telescopic slides)
- Optimum storage utilisation for items of different sizes (small consumables, medicines, bottles, pharmacy items)
- Stacking rim enables the modules to be stacked to save space when not in use
- The safety-stop function prevents the basket from accidentally falling out when pulled
- Create compartments with long and short snap-able dividers which can be locked into place

Modular tray - 5cm (60x40x5cm)
T054060

Modular tray - 10cm (60x40x10cm)
T104060

Modular tray - 20cm (60x40x20cm)
T204060

Modular tray - 5cm (30x40x5cm)
T053040

Modular tray - 10cm (30x40x10cm)
T103040

Modular basket - 10cm (60x40x10cm)
B104060

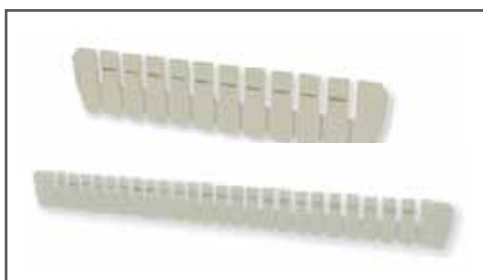

Modular basket - 20cm (60x40x20cm)
B204060

Modular basket - 10cm (30x40x10cm)
B103040

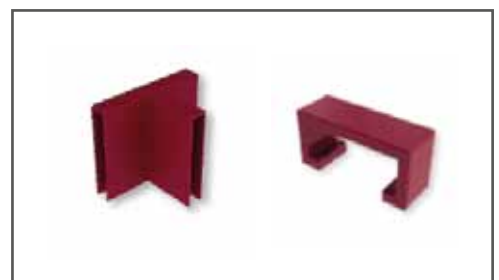

Lid for modules - 60x40x1.5cm
L4060

Dividers - short or long
for all modules

Label holders - horizontal or vertical
with or without cover

Holders and locks for dividers
secure dividers to baskets/trays

High density modular storage system

SHELVES, CATHETER HOLDERS, TELESCOPIC SLIDES

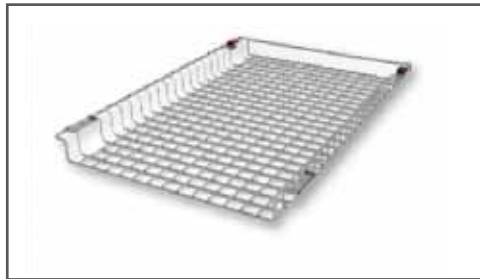

- Shelves can be used instead of baskets/trays
- Can be used with side panels in AluFlex carts and cabinets or plastic support rails and telescopic slides on open frame racks
- Chrome wire and stainless steel options
- Specialised shelves for storing sterile containers (can hold up to 25kg)

Telescopic slides

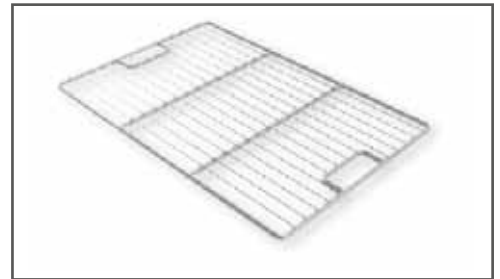

- Allow bulk loading of modules - max. load-bearing capacity: 40kg
- Double ball bearing for precision extension
- Ideal for heavy items, e.g. infusion bottles
- Click into perforated support rails without tools, position can be changed at any time

Laminate shelf 6mm SHELF-HPL,
Melamine shelf 12mm SHELF-MEL

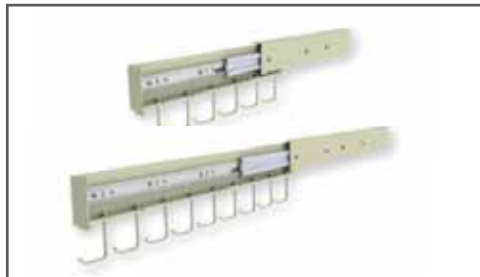

Wire shelf for sterile containers
WS-INSTR, WS-INSTR-SS

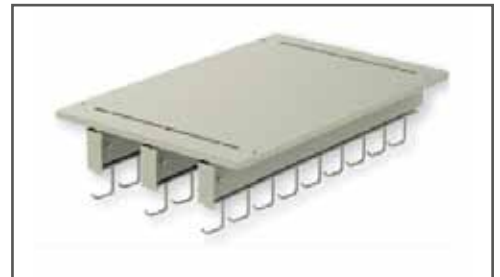

Stainless steel wire shelf
with handles SSS-6040WH

Wire shelf 40cm deep - E: WS-6040-E
Wire shelf 60cm deep - U: WS-6040-U

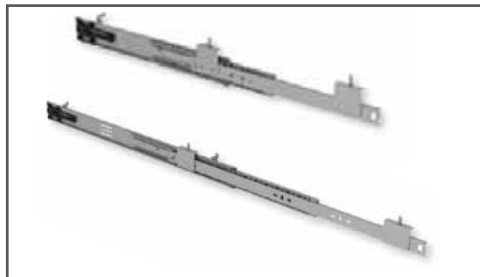

Retractable catheter holders - mount
under shelf CATHH-EU/CATHH-US

Laminate (HPL) shelf 12mm for
catheter holders CATH-SHELF-E/U

Laminate (HPL) shelf 12mm for
catheter holders CATH-SHELF-E/U

Telescopic slides - 40cm or 60cm deep
BBG-RK-E/U

Perforated support rails (for
mounting telescopic slides) PRAIL90

Tilt side panel - 9 insertions + tilts
E: 36.5x37.5cm, U: 56.5x37.5cm

Flex side panel - 4 insertions + tilts
E: 40x30cm, U: 60x30cm

Support wheel for Tilt/Flex side panel,
Basket stop

ABOUT NATIONAL SURGICAL CORPORATION

National Surgical Corporation (NSC) is an import manufacturer in the Healthcare industry, distributing surgical devices and equipment to all major hospitals and specialist doctors throughout Australia.

NSC provides products in two different categories: surgical devices and consumables; and shelving and storage.

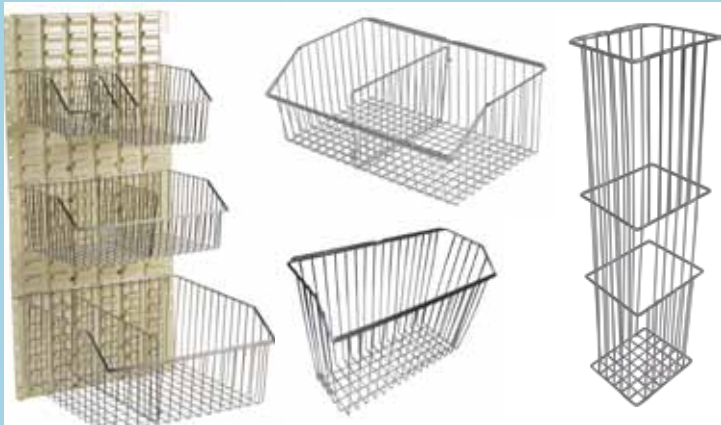

NSC Shelving and Storage Solutions provide tailored made and standardised shelving and storage systems to meet our customer's individual site requirements, budget and schedule. NSC began providing shelving and storage solutions in 2005 to assist hospitals in improving their internal storage requirements.

From our extensive knowledge in the healthcare industry, particularly relating to operating theatres and CSSD, we

understand the space and storage requirements of these specialised areas. As such NSC is able to develop customised shelving solutions for each and every application.

NSC shelving solutions include the following:

- Chrome wire static shelving systems
- Chrome wire mobile shelving/ trolley systems
- Chrome wire baskets: maxi, bed, catheter
- High density modular systems
- Hospital carts, trolleys and bedside cabinets
- Height adjustable CSSD tables
- Mobile wrap racks
- Stainless steel shelving
- Security cages
