storage

High density modular storage systems

Customised modular and interchangeable storage systems incorporating racks, cabinets and carts

From our extensive knowledge in the healthcare industry, NSC understands the space and storage requirements of all specialised areas, particularly relating to hospital operating theatres, wards and CSSDs and develops customised, efficient storage solutions for each and every application

NATIONAL SURGICAL CORPORATION

A proudly founded and owned Australian company - providing value to our customers beyond the product

High density modular storage systems

The high density modular storage systems range includes open frame racks, cabinets, storage carts and procedure carts which all incorporate the interchangeable module system. The entire system is based on the ISO standard 60x40 and the modules have been designed on this basis. The modular systems are available as standard units or can be custom designed and built using various rack, cabinet or cart options to suit your storage parameters.

These modular systems are ideal for storing, organising and transporting theatre consumables, CSSD sterile stock, medicines, pharmacy bottles, anaesthetics, sutures and small consumables.

Why use the Pegasus high density modular system:

- Maximise storage capacity and organisation
- Reduce overall inventories through stock rotation
- Improve the aesthetics of your storage area
- Reduce potential OH&S risks by ability to move modules to various levels as required
- Fully customise the area to suit your needs

High density basket storage systems are ideal for:

- Any hospital department or healthcare facility
- Theatre, CSSD, Wards, Store rooms
- Day surgery
- Anaesthetics store rooms
- Medication store rooms
- Suture trolleys or carts
- ICU/ HDU/ Emergency departments
- Pharmaceutical manufacturer or pharmacy department

Experts in hospital redevelopments and refits

NSC has designed and installed shelving solutions to over 300 customers, mostly hospitals to assist in new builds, redevelopments, fitouts and upgrades.

NSC has the capabilities to design and install large scale hospital redevelopment projects. NSC provides detailed CAD designed drawings to demonstrate the correct scale and size of the shelving site.

for the hospital and healthcare industry

HOW THE SYSTEM WORKS

Tilt side panel view

The entire Pegasus high density modular storage system is based around the uniquely designed **side panels** or **sliding plastic rails** and **interchangeable modules** (baskets, trays and shelves).

The units are designed in either **E (600mm wide)** or **U (400mm wide)** configurations and **additional 'bays' can be added** to make it wider.

MODULES (BASKETS, TRAYS, SHELVES)

All modules are designed to fit in either an E or U style systems and are available in 5cm, 10cm or 20cm heights.

MODULE DISPLAY

The modules can be displayed with **plastic side rails** (racks only) - **horizontal** or **angled**; with **telescopic slides** (for heavy loads); or with **side panels** (Tilt or Flex) affixed to the wall (cabinets, Apollo carts).

Plastic side rails allow modules to be placed at horizontal or angled positions. These rails can be moved at various heights at any time, without tools, and baskets can be displayed on an angle without it falling out.

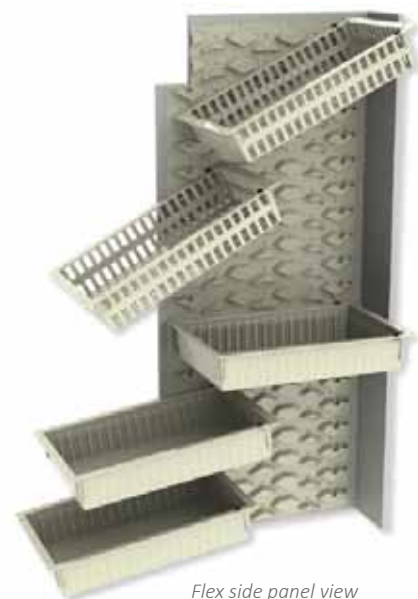

The side panels attach to the wall of the cabinet or Apollo cart and allows the modules to be placed at various levels.

The **Tilt side panels** allow 9 horizontal insertions and either gently or steeply (116°) tilts when pulled out, depending on the position of the stop clip.

The **Flex side panels** allow modules to be stored on an angled or horizontal, providing easier access and viewing of top modules.

UNIQUE SAFETY BASKET STOP

The modules are a retractable system which have a unique safety-stop function which prevents the module from accidentally falling out when pulled or viewed on an angle.

Flex side panel view

OPEN FRAME RACKS

VERSATILE

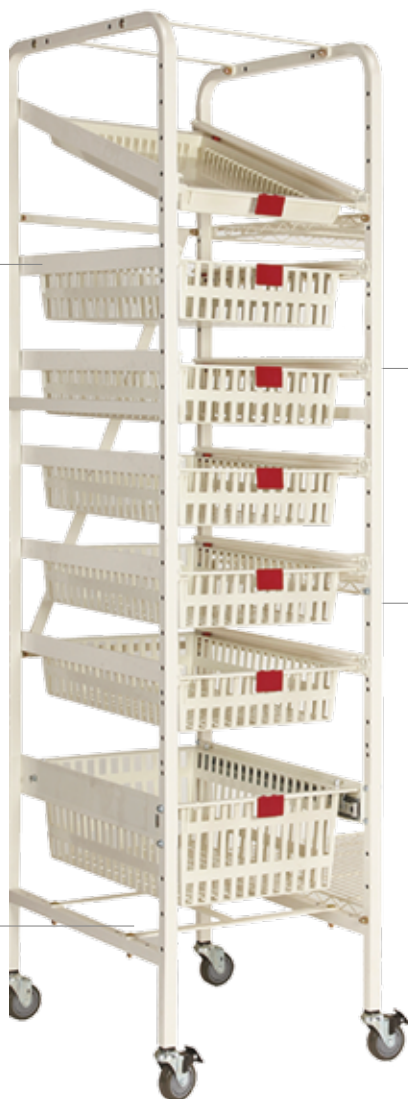

- Plastic rails can be re-positioned without tools
- Flexible divider system

DURABLE

- Strong and sturdy
- 40kg load capacity
- Tubes are galvanised & powder-coated to prevent rusting

CUSTOMISE

Racks can have multiple 'add-on' bays for a wider unit

U type

400mm front and 600mm deep

E type

600mm front and 400mm deep

HYGIENIC

Smooth and easy-to clean surfaces

STABILITY

Stable construction with cross-support rear, top and bottom

OPTIONS FOR MOVEMENT

Available with feet (1935mm height) or mobile with castors (1988mm height). Castors allow for the racks to be moved for cleaning under or around

OPTIONS FOR BASKET DISPLAY

ANGLED RAILS

Fixed rails for top access.
Baskets can be viewed on an angled without falling, even when pulled out

HORIZONTAL RAILS

Baskets can be pulled and viewed on a tilt without falling (up to 5kg).
Optional "click-in" wheels for smoother basket sliding (5-10kg)

TELESCOPIC SLIDES

To be used with baskets heavier than 10kg.
100% extension

CATHETER RACKS/HOOKS

To securely and safely store catheters

CUSTOM DESIGNED

Open frame racks are custom designed and built to your requirements.
The user can request the number of add-on bays, modules, shelves, castors or other accessories required to suit the storage area.

SPACE SAVING = INCREASED STORAGE

Baskets are fully retractable - hence, no gaps are needed between the baskets, no space is wasted and easy access to supplies at the back of the basket is assured

IMPROVED ORGANISATION

Clear line of sight + easy and ergonomic access to all baskets at the higher levels

OPEN FRAME RACKS & CARTS

OPEN FRAME CART OPTION

FEATURES PROTECTIVE BUMPER

Installed with a protective bumper along bottom of cart to protect cart, items being stored and the walls

ORDER WITH ANY TYPE OF MODULE

Open frame carts can feature baskets, trays, wire trays or a combination of all types of modules. These can be removed and repositioned easily

VERSATILE FOR ANY DEPARTMENT

Ideal for storing sterile stock, trays for surgery, pharmacy, medicine storage, anaesthetics and small consumables in hospitals or other healthcare facilities

HANDLE FOR EASY CONTROL

Handle is securely installed on the cart to easily control and move the cart

DIMENSIONS

Available as single, double or triple carts

CABINETS

CUSTOMISABLE

Customised cabinets to suit storage area including tall/standard, underbench, wall mounted. Any height/ width variations can be manufactured

HIGH QUALITY

Cabinets are designed & manufactured using high quality hospital grade melamine

ORGANISATION

Ability to combine the KANBAN stock rotation and ordering system

VERSATILE DOOR OPTIONS

Available open/no door or with rolling tambour door, hinged solid door or glass door

COMPLIANCE

Designed to ISO standard, all modules can fit in cabinet

INCREASE STORAGE CAPACITY

Includes ABS side panels as standard however, retractable telescopic slides can be incorporated for heavier loads

STANDARD/ TALL CABINETS

WALL MOUNTED CABINETS

CUSTOM MADE

Cabinets are custom designed to suit the user's requirements. We can work with builders, architects and hospitals to allow cabinets to be designed to meet the ISO standards and enable the Pegasus system to be installed.

CABINETS

UNDERBENCH CABINETS

INCREASE STORAGE

The Pegasus underbench cabinets can be made in any height up to 1000mm with various bay add-ons. Incorporating louvre panels with NSC chrome wire baskets can also increase storage capacity of the area

T-holder for locking dividers once snapped THLDR
Divider lock to keep secure DIVLCKS

Support wheel for side panels
Flex = PNLWHEEL, Tilt = PNWL-SET

COLOUR CODED HANDLES FOR IMPROVED ORGANISATION

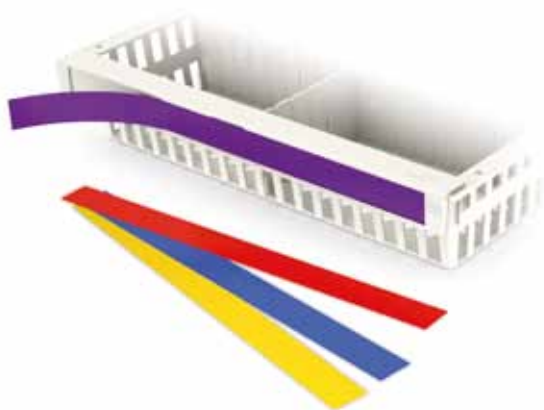

Hospital personnel need to quickly and easily locate supplies for better patient care and efficient operations.

Studies show that nurses spend at least 5-20% of their time on retrieving supplies.

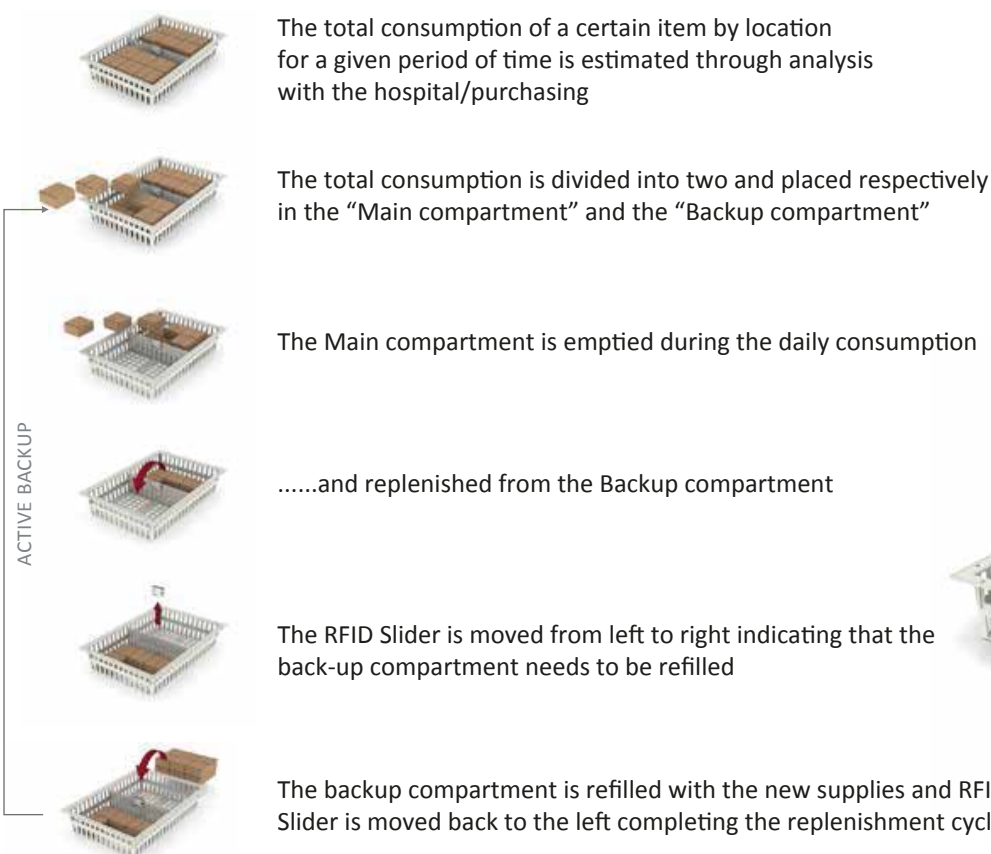

Well-designed and implemented supply storage and inventory management systems can dramatically decrease time spent by nurses on looking for and retrieving supplies.

Incorporating coloured handles can:

- Improve visibility and recognition of stored items
- Be colour coded according to department or item type
- Increase nursing satisfaction as time isn't wasted looking for items
- Be adapted to suit your hospital storage requirements
- Easily replace and clip on any basket/tray

KANBAN INVENTORY MANAGEMENT

WE CAN SAVE YOU

Ask us how we can implement the KanBan system and reduce your hospital costs and improve personnel time.

See our KanBan brochure for more information

Let NSC support you

What makes NSC different to our competitors to support you?

- A proudly Australian owned and founded company
- Combining 25 years of expertise in the healthcare industry
- Creating value for our customers beyond the product
- Working with our customers to offer specialised solutions
- Offering a large product range focused on cost effectiveness, patient care and productivity
- Low overheads allows us to provide cost savings to our customers compared to the multinationals
- Coordinated, whole company approach to every customer
- Establishing trust for long term customer relationships

Who are we?

National Surgical Corporation (NSC) is an import manufacturer in the healthcare industry, distributing surgical instruments, consumables, equipment and shelving to all major hospitals and healthcare facilities throughout Australia. Our extensive product range can be used by all specialist disciplines and departments within a hospital, day surgery or other healthcare facility.

Let NSC support you and your department

Don't be afraid to change, NSC will support and assist you throughout every step. NSC has extensive training and inservicing material available and can tailor a program to meet your individual needs so that all personnel are aware of how the product operates. Switching to NSC can save you significantly and we can show you how!

Our range includes

Wound drains

Electrosurgical range

OT and general consumables

Surgical instruments

Laparoscopic instruments

Medichill ice packs

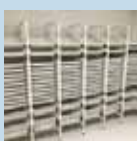

Protection products

Cleaning & sterilisation

Shelving & storage

High density storage
