NO *Touch*TM

CONTAMINATION AND TEARS ARE A THING OF THE PAST WITH NO-TOUCH™... FROM THE CSSD TO THE OT, WITH VIRTUALLY NO HUMAN INTERACTION

The No-Touch™ system eliminates human interaction during instrument reprocessing thanks to our dedicated ISO Standard Stainless Steel shelves and baskets and our functional lines of open and closed transportations carts.

STEP 1
Clean Instrument Wrapping

STEP 2
Wrapped Instruments are placed on No Touch Shelf and into Steriliser (shelf is handled, pack is not touched)

STEP 3
No Touch Shelf (w/sterile pack) is transported to Sterile Storage (shelf is handled, pack is not touched)

STEP 4
No Touch Shelf (w/sterile pack) is transported to OT to be opened by Nurse

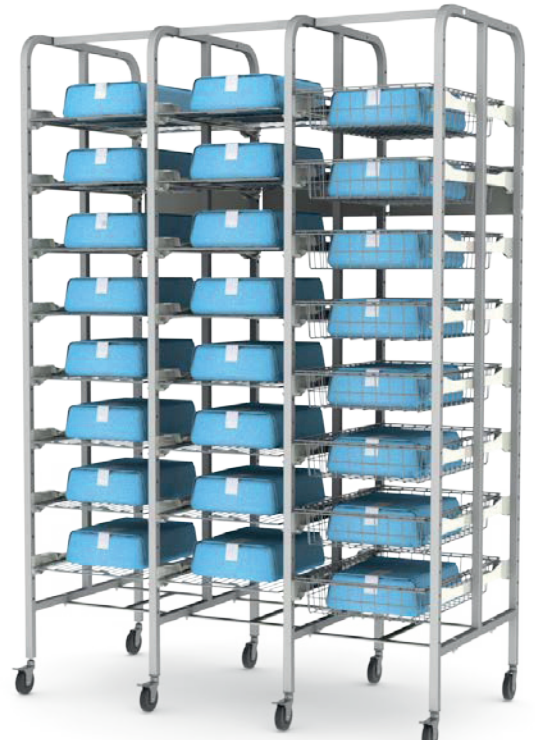

Mobile & Static Storage Systems

Stainless steel Transport Cart

Open Transportation Trolley

Sterile Instrument Rack Storage

STAINLESS STEEL MODULES

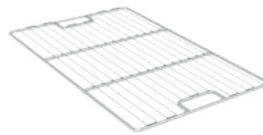

Modules suitable for sterilisation

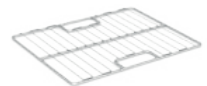

Wire Basket
60X40cm, 10cm deep

Wire basket
60X40cm, 20cm deep

Flat Shelf
60X40cm

Flat Shelf Half Size
30X40cm

THIS

Eliminate contamination and tears during transportation by touching only the carrier shelf, and not the sterile pack

NOT THIS

Maximum sterility during transportation

Safeguards patients from infection

NO *Touch*™
